

LM185QML Adjustable Micropower Voltage References

Check for Samples: [LM185QML](#)

FEATURES

- Adjustable from 1.24V to 5.30V
- Operating Current of 10 μ A to 20mA
- 1 Ω Dynamic Impedance
- Low Temperature Coefficient

DESCRIPTION

The LM185 are micropower 3-terminal adjustable band-gap voltage reference diodes. Operating from 1.24 to 5.3V and over a 10 μ A to 20mA current range, they feature exceptionally low dynamic impedance and good temperature stability. On-chip trimming is used to provide tight voltage tolerance. Since the LM185 band-gap reference uses only transistors and resistors, low noise and good long-term stability result.

Careful design of the LM185 has made the device tolerant of capacitive loading, making it easy to use in almost any reference application. The wide dynamic operating range allows its use with widely varying supplies with excellent regulation.

The extremely low power drain of the LM185 makes it useful for micropower circuitry. This voltage reference can be used to make portable meters, regulators or general purpose analog circuitry with battery life approaching shelf life. Further, the wide operating current allows it to replace older references with a tighter tolerance part.

Block Diagram

Schematic Diagram

These devices have limited built-in ESD protection. The leads should be shorted together or the device placed in conductive foam during storage or handling to prevent electrostatic damage to the MOS gates.

Absolute Maximum Ratings⁽¹⁾

Reverse Current			30mA
Forward Current			10mA
Operating Temperature Range			-55°C ≤ T _A ≤ 125°C
Storage Temperature			-55°C ≤ T _A ≤ 150°C
Maximum Junction Temperature T _{Jmax}			150°C
Lead Temperature (soldering, 10 seconds)			300°C
Thermal Resistance	θ _{JA}	LCCC Package (Still Air)	100°C/W
		LCCC Package (500LF/Min Air flow)	73°C/W
		Metal Can Package (Still Air)	300°C/W
		Metal Can Package (500LF/Min Air flow)	139°C/W
		CLGA Package (Still Air)	194°C/W
		CLGA Package (500LF/Min Air flow)	128°C/W
	θ _{JC}	LCCC Package	25°C/W
		Metal Can Package	57°C/W
		CLGA Package	23°C/W
Package Weight (Typical)		LCCC Package	TBD
		Metal Can Package	TBD
		CLGA Package	210mg
ESD Tolerance ⁽²⁾			500V

- (1) Absolute Maximum Ratings are limits beyond which damage to the device may occur. Operating Ratings are conditions under which operation of the device is intended to be functional. For guaranteed specifications and test conditions, see the Electrical Characteristics.
- (2) Human body model, 1.5 kΩ in series with 100 pF.

(1) Functional test.

(2) The average temperature coefficient is defined as the maximum deviation of reference voltage, at all measured temperatures between the operating T_{Min} & T_{Max}, divided by (T_{Max} – T_{Min}). The measured temperatures (T_{Measured}) are –55°C, 25°C, & 125°C or ΔV_{Ref} / (T_{Max} – T_{Min})

REVISION HISTORY SECTION

Released	Revision	Section	Originator	Changes
11/08/05	A	New Release, Corporate format	L. Lytle	2 MDS data sheets converted into one Corp. data sheet format. MNLM185B-X Rev 0B0 and MNLM185BY-X Rev 0B0 will be archived.
04/06/06	B	Ordering Information Table, WG Connection Diagram, Absolute Maximum Ratings Section, Physical Dimensions Section	R. Malone	Added NSID, Connection Diagram, Physical Dimension Dwg, Thermal Resistance and Package Weight for NAC package. Revision A will be Archived.
06/12/08	C	LM185B and LM185BY Electrical Section	Larry McGee	Correct IC test, $V_R = V_{REF}$ condition, subgroup 1, 2, 3 moved limits to the maximum column. Revision B will be Archived.
03/27/13	D	All		Changed layout of National Data Sheet to TI format.

LM185BWG/883	Active	Production	CFP (NAC) 10	54 TUBE	No	SNPB	Level-1-NA-UNLIM	-55 to 125	LM185BWG /883 Q 5962-90914 02QYA ACO 02QYA >T

⁽¹⁾ **Status:** For more details on status, see our [product life cycle](#).

⁽²⁾ **Material type:** When designated, preproduction parts are prototypes/experimental devices, and are not yet approved or released for full production. Testing and final process, including without limitation quality assurance, reliability performance testing, and/or process qualification, may not yet be complete, and this item is subject to further changes or possible discontinuation. If available for ordering, purchases will be subject to an additional waiver at checkout, and are intended for early internal evaluation purposes only. These items are sold without warranties of any kind.

⁽³⁾ **RoHS values:** Yes, No, RoHS Exempt. See the [TI RoHS Statement](#) for additional information and value definition.

⁽⁴⁾ **Lead finish/Ball material:** Parts may have multiple material finish options. Finish options are separated by a vertical ruled line. Lead finish/Ball material values may wrap to two lines if the finish value exceeds the maximum column width.

⁽⁵⁾ **MSL rating/Peak reflow:** The moisture sensitivity level ratings and peak solder (reflow) temperatures. In the event that a part has multiple moisture sensitivity ratings, only the lowest level per JEDEC standards is shown. Refer to the shipping label for the actual reflow temperature that will be used to mount the part to the printed circuit board.

⁽⁶⁾ **Part marking:** There may be an additional marking, which relates to the logo, the lot trace code information, or the environmental category of the part.

Multiple part markings will be inside parentheses. Only one part marking contained in parentheses and separated by a "-" will appear on a part. If a line is indented then it is a continuation of the previous line and the two combined represent the entire part marking for that device.

Important Information and Disclaimer: The information provided on this page represents TI's knowledge and belief as of the date that it is provided. TI bases its knowledge and belief on information provided by third parties, and makes no representation or warranty as to the accuracy of such information. Efforts are underway to better integrate information from third parties. TI has taken and continues to take reasonable steps to provide representative and accurate information but may not have conducted destructive testing or chemical analysis on incoming materials and chemicals. TI and TI suppliers consider certain information to be proprietary, and thus CAS numbers and other limited information may not be available for release.

In no event shall TI's liability arising out of such information exceed the total purchase price of the TI part(s) at issue in this document sold by TI to Customer on an annual basis.

TRAY
